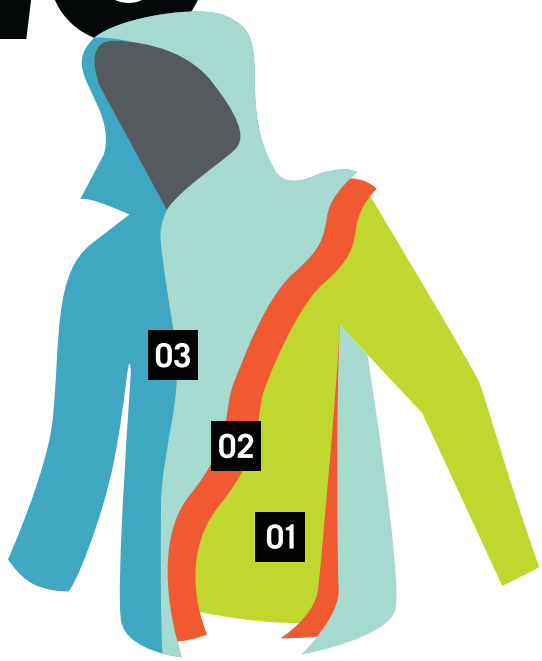
THE SCIENCE OF LAYERING



WHETHER YOU'RE INTO MOUNTAIN, BACKCOUNTRY OR TRAIL RIDING, STAYING WARM AND DRY IS ESSENTIAL. IT'S ALL ABOUT LAYERING; A SCIENCE WE'VE PERFECTED.

Find the perfect combination of base, mid and outer layers in the following pages.

01
BASE LAYERS

AT THE CORE OF EVERYTHING.

It all starts here; It's essential to stay dry to stay warm. Base layers wick away moisture from perspiration against your skin, the first crucial step in preserving warmth.

02
MID LAYERS

COMFORT THAT ADJUSTS WITH YOU.

Using a mid layer allows you to adjust your ideal warmth level. Winter weather is notoriously variable. Stay ahead of the game, stay comfortable.

03
OUTER LAYERS

NON-INSULATED
INSULATED

YOUR FIRST LINE OF DEFENSE.

Keep out the elements and hold in the warmth. We offer outer layers engineered with the highest performance materials like Sympatex, Primaloft and RPM technologies to match your riding style and needs.

BUILD YOUR OWN SYSTEM.

We make it easy to choose the right gear by rating all layering options with easy-to-understand bar graphs and relevant information to help you dial in the perfect balance of comfort and performance for you.

BASE LAYERS

Base layers are essential to every rider, regardless of style. They wick away moisture from perspiration to keep you dry - which is the first step to staying warm and comfortable - so the mid layer can add the warmth while the outer shell keeps the wind and snow where it belongs - out.

NEW Merino Base Layers

Merino wool base layer delivers excellent warmth while wicking away moisture, soft to the touch.

- Permanent anti-odor performance.
- Vintage logos.

- Committed to delivering feel-good products that empower you to stay in the moment. Warer, drier, softer and more compressible than any other synthetic insulation.

To install the studs, always use the installation tools, procedures and torque specified in the instructions. Proper installation provides maximum product longevity and helps prevent track damage. BRP recommends that studs be installed by authorized BRP dealers, and on approved pre-patterned tracks only. These tracks come standard on most 2019 Ski-Doo snowmobiles. Look for this symbol on your track. Woody's products are designed to fit and interact with each other. The stud nut and support plate form a complete unit. The use of aggressive skis, ski carbide runners or studs will alter the handling of your snowmobile, particularly in terms of manoeuvrability, acceleration and braking. Please refer to your Operators Guide for more details.

WHEELS & SLIDER SHOES

Sliders with Vespel† Inserts

- Uses DuPont Vespel inserts for less friction.
- Can be cut to desired lenght.
- Better fuel efficiency, more power and increased vehicle speed, due to reduced friction between the track clips and slides.
- Reduced need for maintenance and associated costs.
- Extended life due to enhanced wear characteristics of Vespel polyamide over incumbent UHMW PE.
- Allows riders to operate sleds in less than acceptable snow and trail conditions since water from snow is not needed for lubricity as with incumbent UHMW PE slide rails.

YOUR SLED IS THE SUM OF ITS PARTS. MAKE EVERY ONE COUNT BY USING ONLY GENUINE BRP PARTS.

WHY YOU SHOULD USE GENUINE BRP PARTS

Don't take a chance with your valuable Ski-Doo snowmobiles – when replacing parts, use only genuine BRP parts. BRP parts take into account the complete vehicle and its performance - protecting our reputation and your valuable investment. BRP parts are manufactured to our original equipment standards for materials, finish and fit.

BRP PARTS ARE ENGINEERED AND TESTED TO THE HIGHER STANDARD – YOURS.

- Physical field testing
- Extended wear testing
- Laboratory testing
- Harsh environment and element testing
- UV and exposure testing

With BRP parts, you get the peace-of-mind of a **FULL ONE YEAR WARRANTY**. That's whether they're installed by you or your authorized BRP dealer. And if they're installed by your dealer, labor is covered, too.

BRP rebuilt components are cost-effective and time-saving solutions. BRP rebuilt parts carry the same one year warranty for major assemblies like short blocks, cylinders and crankshafts.
